5. The following is an examiner's statement of reasons for allowance:

The closest prior art to the present invention is Lee et al. (U.S. Patent No. 5,226,005). Lee et al. discloses a dual port content addressable memory having compare circuits and match line putting out match signal to a logic circuit. Lee et al. fails to show or suggest the limitation of a consistency cancel circuit provided in each word line and each match line, the consistency cancel circuit forcibly making the match line inactive when the word line and a write instruction signals are both activated as in claims 1-3 and 5-7, or a consistency cancel circuit for changing the value of the match line according to a write instruction signal and a value of the word line as in claims 4 and 8.
